PostalOne!®

Release 37.2.2.2

The *PostalOne!* system Release *37.2.2.2 (July 17, 2014)* is deployed to introduce software fixes to the system. This includes a correction to issues previously identified in a prior release.

These Release Notes provide the contents of the release and affected subsystems. Contents of this document are subject to change.

1. USPS

PostalOne! Release *37.2.2.2* will be deployed on July 17, 2014 to introduce software fixes to the system. This includes corrections to issues previously identified from a previous release.

1.1. Electronic Data Exchange

When submitting a combined mailing in Mail.XML, a mailer includes multiple Postage Statement create requests. The messages have duplicate container barcodes across messages, but not within a single message. When the mailing is being finalized, duplicate barcodes are created on separate Postage Statements, which pass validations but fail finalization with an internal error. 2469
